

SET UP A MULTI-CURRENCY CRYPTO WALLET AND INTEGRATE WITH A DAPP

STEP-BY-STEP PROCESS

Step 1:

Install a Multi-Currency Wallet (MetaMask or Trust Wallet)

✓ Option A: MetaMask (Recommended for desktop)

1. Visit the official site: <https://metamask.io>
2. Click “**Download**” and install the **browser extension** for Chrome, Firefox, or Brave.
3. Click “**Get Started**” → “**Create a Wallet**”
4. Set a strong password.
5. **Secure your Secret Recovery Phrase** (12-word seed phrase) – store this safely and offline.
6. Wallet setup complete! You are now connected to the Ethereum mainnet by default.

✓ Option B: Trust Wallet (Recommended for mobile)

1. Download **Trust Wallet** from the Google Play Store or Apple App Store.
2. Open the app → Click “**Create a New Wallet**”
3. Write down and secure your **12-word seed phrase**.
4. Wallet is now ready and supports multiple blockchains by default (ETH, BSC, etc.)

Step 2:

Add Other Networks (like Binance Smart Chain) to MetaMask

1. Open MetaMask → Click on the **network dropdown** at the top → Select “**Add network**”
2. Enter the BSC network details:
 - **Network Name:** Binance Smart Chain
 - **New RPC URL:** <https://bsc-dataseed.binance.org/>
 - **Chain ID:** 56
 - **Currency Symbol:** BNB
 - **Block Explorer URL:** <https://bscscan.com/>
3. Click **Save**.
4. Now MetaMask supports both Ethereum and BSC!

Step 3:

Fund Your Wallet (Optional for Testing)

- You can test with **free testnet tokens** (no real money needed).

- For **Ethereum (Goerli Testnet)**:
Use this faucet: <https://goerlifaucet.com>
- For **BSC Testnet**:
Use this faucet: <https://testnet.binance.org/faucet-smart>

Step 4:

Connect Wallet to a DApp

Example DApps:

- **Uniswap** (Ethereum)
- [PancakeSwap](#) (BSC)
- [Aave](#) (Ethereum lending)
- [Compound](#) (DeFi lending)

How to Connect:

1. Visit the DApp's official website.
2. Click "**Connect Wallet**"
3. Choose **MetaMask** (or **WalletConnect** if using Trust Wallet).
4. Approve the connection in your wallet popup.
5. Your wallet is now connected to the DApp!

Step 5:

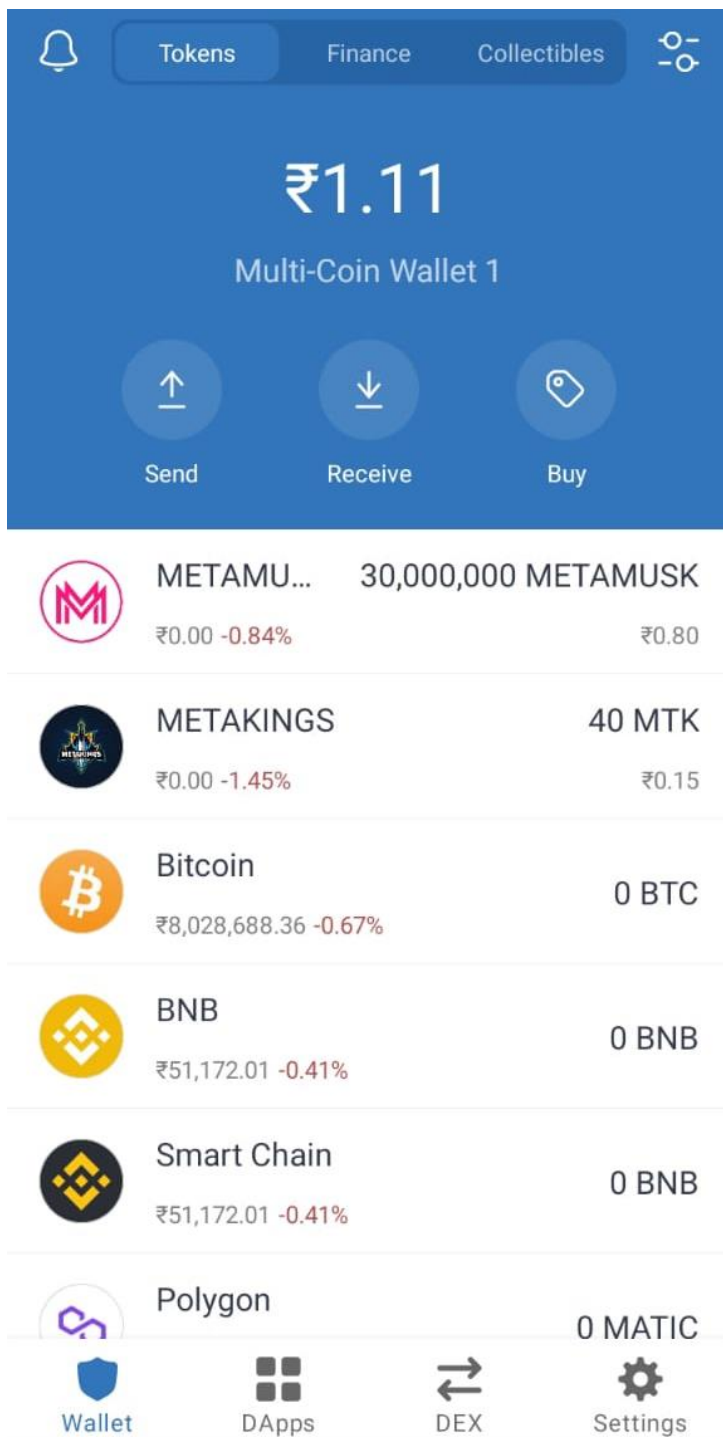

Interact with the Blockchain via the DApp

Try out the following:

- **View token balances** inside the DApp.
- **Send/Receive tokens** using the wallet.
- **Swap tokens** (if on testnet or using small balances).
- **Stake tokens** if supported by the DApp

Final Deliverable

Requirement	Status
Multi-currency wallet setup	 Completed
Ethereum and Binance Smart Chain added	 Completed
Wallet connected to a DApp	 Connected
Blockchain interaction tested	 Done (swap or send)
